

STAMPED HEAT SINKS

for Low Power Devices

INTRODUCTION

Wakefield Thermal Solutions, Inc. offers a wide range of board level power semiconductor heat sinks for surface mount and thru hole devices, including JEDEC/EIA registered outlines TO-3, TO-218, TO-247, and TO-263 (D2PAK). Also covered are MULTIWATT® and axial lead devices. These products are available in stamped aluminum, and selected stampings are manufactured from copper.

A Full line catalog is also available. To receive your copy, please contact your local sales representative, phone our corporate headquarters, email us at info@wakefield.com, or visit us on the web at www.wakefield.com.

DON'T FORGET THE ACCESSORIES!

Many of the heat sinks in this catalog are designed to attach to the component using Wakefield's SpeedClips™, clips integral to the heat sink, or threaded fasteners from other suppliers. Check the individual product descriptions for the appropriate mounting method.

Wakefield Thermal Solutions, Inc. thermal interface materials such as DeltaBOND™, DeltaPAD™, and 120/126 Series thermal joint compounds are designed to facilitate installation and improve thermal performance. Check the full line catalog or web site for more information.

ABOUT WAKEFIELD THERMAL SOLUTIONS, INC.

Thermal Management Solutions for Electronics

- Leadership in design
- Applications Engineering and sales support worldwide
- Aggressive implementation of world-class manufacturing concepts

Wakefield Thermal Solutions, Inc. is recognized as the worldwide leader in innovative thermal management solutions for a diverse range of commercial, industrial, and military markets.

More than 40 years of heat transfer design, analysis, manufacture, and fabrication expertise of components, systems, and assemblies is now joined with an aggressive commitment to customer support, product designs, and engineering services.

Wakefield Thermal Solutions, Inc. offers components and system level thermal management solutions for utilization in business equipment, computers, consumer electronics, automotive, industrial controls, instrumentation, integrated circuits, medical, laser, power conversion, telecommunications, transportation, and welding applications.

Wakefield Thermal Solutions believes that information provided in this product catalog is accurate as of publication date. Product testing for proper performance in customer applications is recommended for all component designs and adhesives. Obtain mechanical samples of all assembly components and test to determine suitability. The physical properties reported herein are representative of performance values obtained by standard predictive and testing methods and typically exclude the interface resistance of any adhesive or other interface material in heat sink data. Wakefield Thermal Solutions is a manufacturer of heat dissipation products and reserves the right to make changes to its products without notice to improve the design or performance characteristics. All trademarks and tradenames used in this publication are for identification purposes only and may be trademarks of their respective companies. All specifications subject to change without notice.

BOARD LEVEL POWER SEMICONDUCTOR HEAT SINKS

217 SERIES Surface Mount Heat Sinks

D'PAK, TO-220, SOT-223, SOL-20

Compatible with surface mount technology (SMT) automated production techniques for ease of assembly and a variety of soldering methods, these heat sinks allow greater packaging densities and reduction in PC-board area, increasing the power dissipation of surface mount devices (SMDs) while maintaining and improving manufacturers' component thermal specifications.

FEATURES AND BENEFITS:

- No interface material is needed
- Copper with tin-lead plating for improved solderability and assembly
- Both the component and the heat sink are installed on the PC-board utilizing standard SMT assembly equipment for "Tape & Reel" and "Tube" formats
- EIA standards and ESD protection are specified
- Can be used with water soluble or no clean SMT solder creams or other pastes

Mounting tabs are pre-tinned to ensure excellent wave-solder bond and good electrical connections for vertical mounting of TO-220 and TO-202 semiconductor packages. These heat sinks are designed for use where minimum PC

board space is available. The 288-1AB is a stamped aluminum heat sink, black anodized, designed for applications requiring good heat dissipation from a heat sink occupying minimum space, available at minimum cost.

Material: Aluminum, Black Anodized

These exceptionally low-cost heat sinks can be mounted horizontally under a TO-220 or TO-202 case style with a maximum height of only 0.375 in. (9.4). For added performance, a 271 Series heat sink can also be used for double-sided heat dissipation.

The 270-AB and 280-AB accept one power semiconductor; the 272-AB is designed for two power semiconductors. Specify solderable tab options for the 272 Series by the addition of suffix "01" or "02" to the standard part number (i.e. 272-AB01 or 272-AB02).

Material: Aluminum, Black Anodized

Low in cost and compact in overall dimensions, one 289 Series heat sink can accommodate one semiconductor; the 289 Series is available with a black anodized finish (289-AB) or with

no finish (289-AP). Two semiconductors can be mounted to the 290-2AB style.

Efficient heat removal at low cost can be achieved by inserting the 286 Series directly into pre-drilled circuit boards; scored mounting tabs may be bent after insertion to provide added stability.

The 286 Series can be wavesoldered directly to the board. Material: 286-AB style (aluminum, black anodized), 286-CBT style (copper, black paint tin tabs), and 286-CT style (copper, tinned).

Materials and Finish: Cups – beryllium copper, black ebonol "C"; Bases – brass, black ebonol "C"

Base Mounting Configurations — TO-5

Plain Type — Epoxy bonded, or used with #4 pan head screws.

Tapped Base — #4-40 UNC screw (not supplied) fits tapped hole. Care should be taken not to use too long a screw, which could short against the semiconductor case. For correct screw lengths:

Correct Screw Length (L) = Depth of Base + Panel Thickness + Washer Thickness

Stud Mounting Base #6-32 UNC. Nuts and washers not supplied. Stud hole must be slightly countersunk to ensure flat mounting.

To determine the correct mounting screw lengths, add dimensions as follows:

Correct Screw Length (L) = Depth of Base + Panel Thickness + Washer Thickness

Epoxy Insulated For TO-5

NATURAL AND FORCED CONVECTION CHARACTERISTICS

Power semiconductors packaged in a TO-92 style plastic case can be cooled effectively at little additional cost with the addition of the 292-AB heat sink. The 292-AB is effective over the typical power range of such devices. Material: Aluminum, Black Anodized.

BOARD LEVEL POWER SEMICONDUCTOR HEAT SINKS

TO-3, TO-66, TO-220

Standard P/N	Height Above PC Board in. (mm)	Outline Dimensions in. (mm)	Thermal Performance at Typical Load		Semiconductor Mounting Hole Pattern	Weight lbs. (grams)
			Natural Convection	Forced Convection		
690-3B ▲	1.310 (33.3)	1.860 (47.2)-sq	44°C @ 7.5W	2.0°C/W @ 400 LFM	(1) TO-3	0.0700 (31.75)
690-66B	1.310 (33.3)	1.860 (47.2)-sq	44°C @ 7.5W	2.0°C/W @ 400 LFM	(1) TO-66	0.0700 (31.75)
690-220B	1.310 (33.3)	1.860 (47.2)-sq	44°C @ 7.5W	2.0°C/W @ 400 LFM	(2) TO-220	0.0700 (31.75)

Material: Aluminum, Black Anodized

These low-cost heat sinks provide the most power dissipation at the lowest unit cost and are available in three standard types to mount and cool one TO-3 or TO-66 metal power semiconductor type or two plastic package TO-220 power semiconductor types. For higher power

semiconductors, the 690 Series can dissipate up to 20 watts while maintaining a mounting surface temperature rise above ambient air temperature of no more than 91°C.

635-125B2	1.250 (31.8)	1.900 (48.3) x 1.420 (36.0)	53°C @ 8.0W	3.1°C/W @ 300 LFM	TO-3	0.028 (12.70)

Material: Aluminum Alloy, Black Anodized

Use this low-cost TO-3 heat sink style for multiple TO-3 applications on a single printed circuit board, where two or more TO-3s must be placed in proximity and minimum space is

available for heat sinking. Four different heights are available, all with TO-3 mounting hole pattern in the base. Consult factory for TO-66, TO-220, and multilead IC hole patterns.

Name _____

Title _____

Company _____

Division/Department _____ Mail Stop _____

Address _____

City _____

State _____ Zip _____ Country _____

Telephone () _____ Fax () _____

Email _____

Product or project _____

APPLICATION INFORMATION REQUIRED:

1. What type of electronic device will be cooled? _____

2. How many of these devices will be cooled? _____

3. How many watts of power must be dissipated from each device and in aggregate? _____

Please specify: _____ Each device _____ Total Power _____

A sketch of the heat distribution on the base is attached. ☐ Yes ☐ No

A sketch of the component is also being faxed. ☐ Yes ☐ No

4. What is the maximum allowable junction temperature of the device? _____ °C

(See the manufacturer's data sheet).

If no junction temperature has been specified, what is the maximum case temperature? _____ °C

5. What is the thermal resistance of the semiconductor from junction to case - θ_{j-c} ? _____

(See the manufacturer's data sheet). θ_{j-c} _____

6. Is electrical isolation required between the device case and the heat sink? _____

At what voltage level? _____

7. What finish is required on the heat sink? _____ Anodize _____ Paint _____ Chromate _____

_____ Special _____ None What color? _____

8. What is the maximum ambient air temperature? _____ °C

9. What type of convection is required? _____ Forced _____ Natural _____

10. If forced convection have you chosen a fan? ☐ Yes ☐ No

Fan Manufacturer/Part Number _____ Fan Size _____

Free Flow (CFM) _____ Static Pressure (Inches H₂O) _____

11. Will you shroud the air flow (i.e., direct the air through the heat sink)? ☐ Yes ☐ No

If no, what is the cross-sectional size of the air space where the heat sink will be located?

_____ Width X _____ Height _____

12. How much space is available for this heat sink?

Length _____ Width _____ Height _____ in. or cm _____

Samples needed by: _____ Prototype completion date: _____

Pre-production target date: _____ Production target date: _____

Rate of usage: _____ Estimated Annual Usage (EAU): _____

Estimated program life expectancy: _____
